

# Measles outbreak in Auckland

Many children under 5 years are ending up in hospital with severe measles.

Please vaccinate your children when 12 months and 4 years old.

Do not delay. Getting vaccinations on time will protect your family in this outbreak.

If your children or you have missed any vaccinations, please see your doctor now to catch up. It's **FREE** at your GP.

If your children are vaccinated, they won't need to stay at home if there is measles at your centre.

Keep your child at home if they are sick and watch out for:

Cough

Runny nose

Sore red eyes

Rash

If you or your children show symptoms please stay at home and call your doctor or Healthline (0800 611 116) for advice.
